Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-14 are replete with numerous errors and informalities too numerous to mention specifically. These claims should be revised carefully. Examples of such errors are:

In claim 1, line 14, "the support" lacks proper antecedent basis.

In claim 3, line 27, "the overhang portions" lack proper antecedent basis.

Applicant is reminded that these noted instances are exemplary only. It is Applicants responsibility to further review the claims for instances of indefiniteness not specifically cited.\

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Zeeland ' 381 in view of McGill '767.

Art Unit: 3754

Zeeland shows an ice cream pack 11 comprising an extrusion nozzle. Zeeland lacks the extrusion nozzle truncated. McGill shows an ice cream pack with a truncated nozzle 56. It would have been obvious to one of ordinary skill in the art to have modified the Zeeland nozzle with a truncated shape as taught by McGill to assist the flow by gravity.

Re claims 2-5, 7-14 official notice has been taken that the disc, overhang portions, pack made of polypropylene, heated radial mounts, rack, and height adjusted holder and return spring are well known in the art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. De Vries and Crossley were cited to show further examples of ice cream packs.
